

***Milan Kučan's Gangsterism** (the graph concept made according to the paper of Maja Sunčič, *Milan Kucan: All the worst to you!*, Reporter 7:2:98,13 January 2014) is a European phenomenon that a gangster state can exist in the civilized world. Examples of this type are just North Korea and Venezuela, but in a milder form, there are Putin's Russia, Ukraine and the others. Yet where Slovenia was seduced astray, where the gangsterism in the form of parastate rules legally the people of Slovenia—as a derision to the entire democratic Europe?

Milan Kučan, the godfather, the creator of gangsterism in Slovenia, has its own inn gangster staff of conspirators and advisers against the Slovenian people. At this vile work he uses in the graph listed *marionettes* and the new as the already by him abolished *political parties*. Kučan's gangster network is an old as a new one. National interest of Kučan's gangster parastate means the technological collapse, the economic fiasco, the collapse of morals, the financial bankruptcy, and the abduction of the country. For the tycoon companies in debt, the Kučan's gangsterism issues and will issue the account to the Slovenian taxpayers.
